## Certified Residential Energy Auditor

Residential Thermo Scanning

Energy Saving Measures

The first step to keeping energy in your home - and money in your wallet - is to find out where you are using and losing energy. Power Services' Certified Residential Energy Audit Program can help.

### Our Service Includes the Inspection of:

- ✚ HVAC
- ✚ Insulation
- ✚ Attic
- ✚ Ventilation/Infiltration
- ✚ Lighting
- ✚ Water Heater and Piping
- ✚ Interior and Exterior ( Infrared Scanning)
- ✚ Health and Safety ( Mold and Mildew)

Power Services will send a complete report that outlines the findings of the certified audit and will recommend cost-effective energy efficiency measures for your home. As the costs of maintaining a home increase in today's market, the number of residential energy survey requests has risen dramatically. Infrared thermograph imaging integrated into a comprehensive energy audit program is proving to be a definite value-added service for our customers.
