# Infrared Imaging

Are worn bearings grinding out hours of costly down time?

Infrared Imaging will help you:

- ✦ Locate Loose Connections
- ✦ Locate Bearing Wear and Mechanical Friction
- ✦ Monitor Heating/Cooking Uniformity
- ✦ Find Boiler Tube Problems
- ✦ Evaluate Building Envelope Efficiency
- ✦ Meet Insurance Compliance

Checking for hot spots in gears, motors, electrical circuits or equipment allows for preemptive action to control facility costs, extend equipment life, prevent unscheduled production downtime and increase overall profitability.
