

Put **Power Services Inc.** to the Test...

DIESEL EMISSIONS TESTING

Have you checked your Truck Fleet's Diesel Emissions lately?

Why bother?

Did you know that you could be fined between \$800 and \$10,000 if you fail a random emissions test?

I could get fined?

If you drive through California, Connecticut, Illinois, Maine, Maryland, Massachusetts, Nevada, New Jersey, New Hampshire, New York, and Ontario (Canada), **ALL DIESEL TRUCKS ARE SUBJECT TO RANDOM ROADSIDE TESTING – EVEN TRUCKS WITH USDOT NUMBERS.**

What if my Truck fails?

The State of California Enforcement:

- \$800 for the first offense.
- \$1,800 for the second and each subsequent offense.
- For the third violation in 12 months, the vehicle may be taken out of service.

Why should I test my Trucks now?

The California Air Resource Board is visiting fleets to check the fleet's records to ensure that they are testing their vehicles yearly. Fleets **MUST** do yearly smoke tests!

Why should we use Power Services?

We use the SMOKE CHECK 1667 which is the unit that the governments of Arizona, California, Colorado, Connecticut, Idaho, Illinois, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ontario (Canada), Pennsylvania & Vermont use in their random tests.

- 15 years experience in preventative maintenance testing.
- Fast, courteous and conscientious service.
- Highly trained and experienced technicians.
- Fair prices.

SAVE THE FINES, SAVE THE TIME...

**CHECK YOUR DIESEL EMISSIONS REGULARLY
WITH **POWER SERVICES, INC.'S** OPACITY TESTING SERVICE.**
